ENTRY-LEVEL IT SUPPORT / HELP DESK ANALYST

Bilingual entry-level IT support professional with hands-on experience building and operating a secure help desk, administering Linux systems, troubleshooting hardware/software and connectivity issues, and documenting repeatable resolutions. Combines 4+ years of customer service with practical ticket triage, access control, MySQL, and QA experience.

TECHNICAL SKILLS

Technical Support: Tier 1 triage, incident and request tracking, hardware/software diagnostics, password resets, remote support, SLA awareness

Systems & Networking: Windows, macOS, Ubuntu/Debian Server, Microsoft 365, printers/peripherals, DNS A/CNAME, TCP/IP basics, SSH, UFW

Administration & Data: Linux CLI, Bash, users/groups/permissions, filesystems, MySQL, SQLite, Python virtual environments, service health checks

Support Operations: Ticket ownership, prioritization, escalation, audit logs, SOPs, knowledge-base documentation, English/Spanish communication

PROFESSIONAL EXPERIENCE

IT Systems Developer / Software Engineer, Founder - Discover Yourself

10/2025 - Present

discover-yourself.app

- Built TicketDesk, a Python/Flask and SQLite service desk for incident intake, searchable queues, assignment, priority, SLA targets, public replies, internal notes, and resolution tracking.
- Implemented requester, agent, and administrator roles with object-level authorization, CSRF protection, PBKDF2 password hashing, secure headers, validation, and auditable login/ticket events.
- Created an idempotent one-command local setup that builds a Python virtual environment, generates secrets, initializes SQLite, seeds demo accounts and tickets, and starts the service.
- Designed and executed a risk-based QA session covering access control, ticket lifecycle, communication privacy, accessibility, responsive usability, persistence, and recovery; automated 20 tests at 91% coverage.
- Launched and operate discover-yourself.app, including DNS A/CNAME records, GitHub Actions deployment, production troubleshooting, and customer-facing support for a live product.

SELECTED PROJECT

Home Lab Server

github.com/webDeveloper42/home-lab-server | github.com/webDeveloper42/linux-sysadmin-notes

- Administered Ubuntu Server with SSH keys, UFW, users/groups, permissions, MySQL-backed services, and documented recovery procedures.
- Diagnosed remote-access, filesystem permission, firewall, and service configuration failures using command-line tools and logs.

EDUCATION & LEADERSHIP

Software Engineer Certificate, TripleTen

April 2026

Eagle Scout, Boy Scouts of America - Troop 1869, Washington, DC

2018
